

I'm Dreaming of a Data Party

(sung to the tune of "White Christmas")

I'm dreaming of a data party
Intended users need to know
How the e-valuation
Gives a recommendation
To help their program thrive and grow

[chorus]

*I'm dreaming of some sense-making
A time par-ti-ci-pa-to-ry
May your stakeholders be cheerful, and bright
And may all your sessions give insight*

I'm dreaming of a data party
To get their input, oh so wise
Get their buy-in, no confusion
On the results and conclusion
When outcomes, go before their eyes

[chorus]

I'm dreaming of some data placemats
So they can play with their findings
Give it all consideration
And help with interpretation
See what, suggestions that it brings

[chorus]

I'm going to seek consen-sus
I know there might be some debate
And perhaps a few surprises
But we'll see just what arises
'Cause people, support what they create

*I'm dreaming of some sense-making
A time par-ti-ci-pa-to-ry
May your stakeholders be cheerful, and bright
And may all your sessions give insight*
